pages	, as originally file
pages, filed with the	<b>61</b> • • • •
These elements were available or furnished to this Authority in the following languthe language of a translation furnished for the purposes of international search the language of publication of the international application (under Rule 48.3) the language of the translation furnished for the purposes of international or 55.3).	h (under Rule 23.1(b)).
With regard to any nucleotide and/or amino acid sequence disclosed in t preliminary examination was carried out on the basis of the sequence listing:	
contained in the international application in written form.	
filed together with the international application in computer readable form	
Turnished subsequently to this Authority in written form.	
furnished subsequently to this Authority in computer readable form	
The statement that the subsequently furnished written sequence listing international application as filed has been furnished.	
The statement that the information recorded in computer readable form is been furnished.	identical to the written sequence listing has
The amendments have resulted in the cancellation of:	
the description, pages	
the claims, Nos.	
the drawings, sheets/fig	
This report has been established as if (some of) the amendments had not been beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2	made, since they have been considered to go
eplacement sheets which have been furnished to the receiving Office in response to this report as "originally filed" and are not annexed to this report since th nd 70.17).	an invitation under Article 14 are referred to ey do not contain amendments (Rule 70.16
ny replacement sheet containing such amendments must be referred to under item 1	and annexed to this report

#### INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP03/05228

Statement			
Novelty (N)	Claims	1-5	YE
	Claims		NO
Inventive step (IS)	Claims		YE
	Claims	1-5	NO
Industrial applicability (IA)	Claims	1-5	YES
	Claims		NO

Document 1: JP, 10-139756, A (Konishi Chemical Industry Ltd.), 26 May, 1998 (26.05.98), pages 2-4 Document 2: JP, 10-25277, A (Konishi Chemical Industry Ltd.), 27 January, 1998 (27.01.98), pages 2 and 3 Document 3: EP, 220855, A1 (Amoco Corp.), 6 May, 1987 (06.05.87)

The subject matters of claims 1-5 do not appear to involve an inventive step in view of documents 1-3 cited in the ISR.

Documents 1 and 2 respectively describe that 4,4'-dihydroxydiphenyl sulfone or 2,4'-dihydroxydiphenyl sulfone is crystallized separately from an aqueous solution of dihydroxydiphenyl sulfone containing trihydroxytriphenyl disulfone. In the subject matters of claims 1-5, dihydroxydiphenyl sulfone containing the said two isomers is simultaneously crystallized, but document 3 describes that if the pH of the aqueous solution is adjusted to 7 or less, 2,4'-isomer and 4,4'-isomer are simultaneously crystallized. So, a person skilled in the art could have easily conceived of keeping the pH at 5 to 7 for simultaneously crystallizing the two isomers.
